

2.4G Long Range Reader

GTP-9100

Wireless (to GTP-6500)

USB cable (to computer)

TP-9100 Bluetooth Guard Tour Data Base

Z-9100 Wireless Data Transfer Communication Station like a bridge to connect patrol stick with PC.

Just need to take patrol stick to send data to Z-9100, then connect Z-9100 with PC to collect data.

Wireless communication of Z-9100 means there is no any contact interface between patrol stick and Z-9100, data can be downloaded and deleted from patrol stick automatically. The respond transmission distance is about 2m.

Feature

- > Wireless data transfer, no connect interface between patrol reader with communication station.
- > Easy operation, communication station match patrol reader automatically
- > LED light operation direction.
- > High reliability, elegant appearance
- > One communication station can be used for multi patrol reader
- > Multiple language available
