

360degree WiFi PIR Motion Detector

Tuya-PIR

What is WiFi PIR Motion Detector?

Wireless motion detectors are wireless security devices that respond to the presence of motion.

Whenever motion is detected, the device will offer a predetermined response depending upon the needs of the end user.

Wireless motion detectors are also great for home automation.

What is the difference between PIR and motion sensor?

PIR or Passive Infrared motion sensors are designed to reliably detect people, large pets & other large warm moving objects. ...

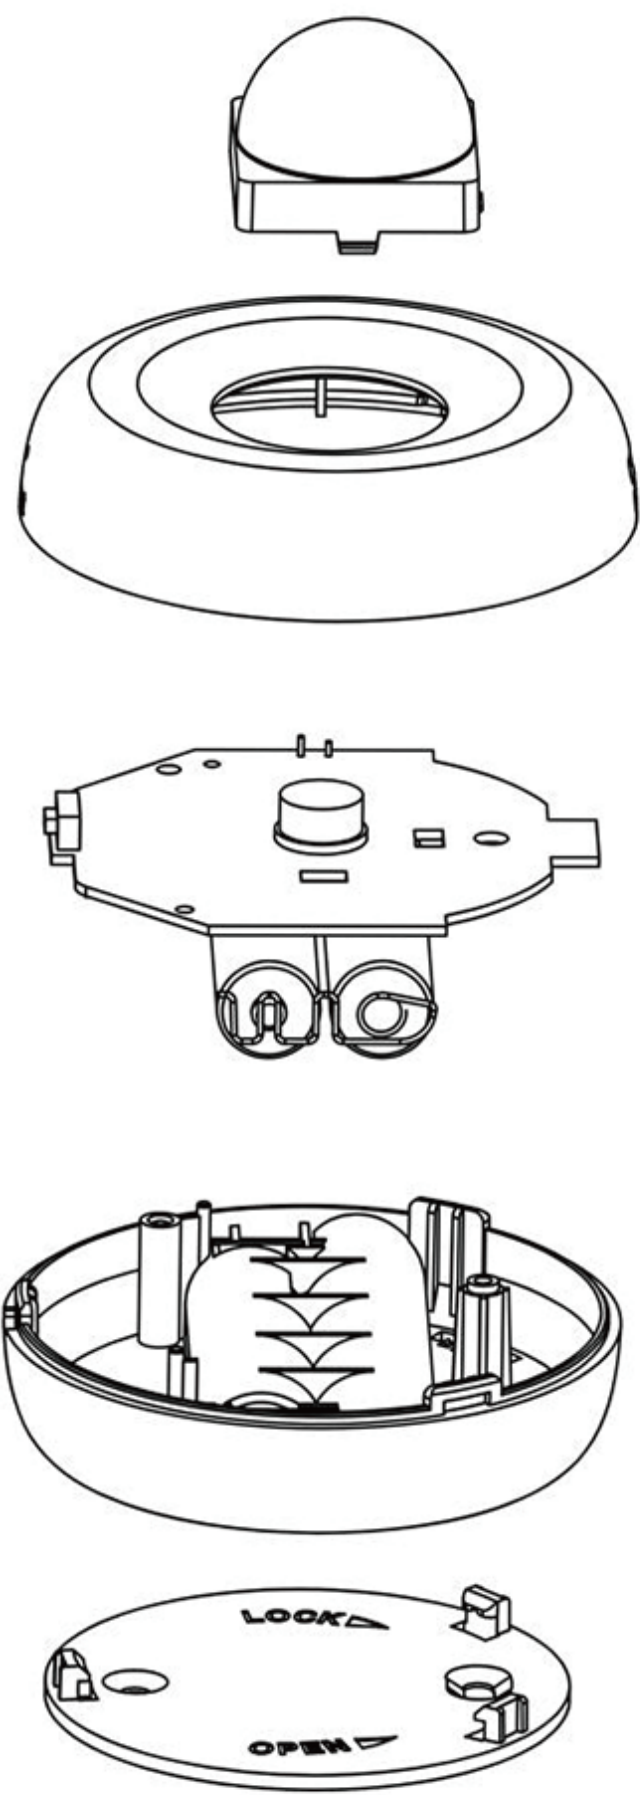

True Detect™ is more than just motion sensing but also includes thermal heat sensing.

The True Detect PIR sensor is triggered when a security camera senses heat whether from people or cars.

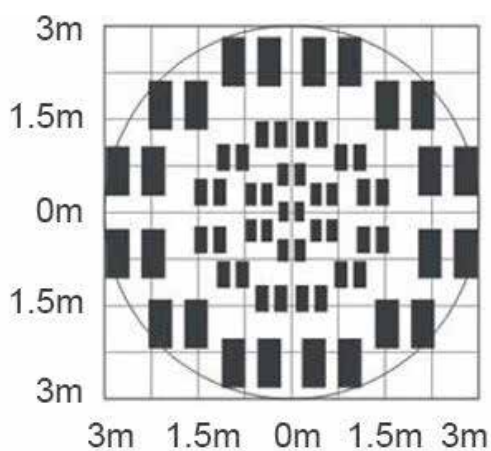

Specifications

USB input voltage:	DC5V/2A(USB cannot be used with dry battery, only rechargeable battery)
Battery:	DC3V LRO3*2
Standby current:	<=75uA
Alarming current:	<=60mA
Low-voltage notification:	<=2.2V
WiFi:	802.11b/g/n
Detection distance:	6M
Detection angle:	360ceiling -installation
Installation method:	ceiling /wall
Working temperature:	-10-50° C
Working humidity:	<=95%RH
