

DC12V 24V Emergency Sound And Light Piezo Siren Strobe Fire Alarm SiLights

S4A-26

How does a fire alarm strobe work?

The strobes let off synchronized flashes of light, with different models of horn strobes possessing different intensities of the flash, depending on the needs for the building. The strobes are to ensure that hearing impaired individuals are aware that the alarm is going off.

Specifications

S4A Model No.	S4A-26	Ambient humidity	90%
Working power	12-24V	Rated voltage	12-24V
Ambient temperature	60 C	Rated current	100mA
