

RS232 / RS485 Converter

C485

Specifications and Features

100% brand new and high quality RS232 to RS485 Converter Adapter w/3P terminal board

It is widely used in industrial automation, door safe, all-in one-card, car parking, ATM, bus charge, eatery sell

Specifications

Compatible with	EIA/TIA RS232 & RS485 standard
Interface RS232 side	DB9 female connector
Interface RS485 side	DB9 male connector with optional terminal board telecommunication agreement
Work environment	-10 C ~ 86°C
relative humidity	5% to 95%
Working mode	aAsynchronous, half-duplex,differential transmission
Transmission media	Common wire,double wire or UTP or Shielding line
Transmission rate	300-115200bps,which is capable of applying between host computers host computer
Transmission distance	RS485 max.1200m,RS232 side max.5m
