

TTLock Bluetooth Smart Keybox - supports PIN and Finger

**KB3F**

Advantages

Appearance design: simple and elegant, suitable for a variety of occasions.

The design of this password lock is very simple and elegant, not only suitable for home wardrobes, but also for lockers and filing cabinets in public places.

The installation is also very simple, no professional tools are required, and you can easily do it yourself.

Functional features: safe and convenient, strong practicality.

It uses advanced encryption technology to ensure that only people who enter the correct password can open the cabinet door.

In addition, it also has anti-pry, anti-drilling, anti-collision and other functions to effectively prevent illegal intrusion.

User experience: easy operation, worry-free maintenance.

In actual use, the operation of this password lock is very simple. It supports automatic locking after multiple attempts of incorrect passwords, which further increases security. In terms of daily maintenance, this password lock is also very worry-free. You only need to replace the battery regularly to keep it working properly.

Specifications

Product Parameter	Parameter Description	Material	3AAAx3/CR123Ax2
S4A Model	KB3F	Power supply	APP, password, fingerprint
Product Name	Key Box	Unlocking Mode	IP65
Product Size	W77mmxH142mmxT50mm	Waterproof	-20°C~55°C(AAAx3)/-40°C~55°C(CR123Ax2)
Storage Size	W64mm x H100mm x T18.5mm (Keybox without hook)	Working Temperature	40%RH~80%RH (no condensation cream)
	W64mm x H73mm x T18.5mm (Keybox with hook)	Battery Life	Unlock 10 times per day (9 months for 3*AAA)/(1 year for 2*CR123A)
Working Humidity	Aluminum alloy
